USA | (405)-861-6436 | netisaikrishna@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

- Machine learning engineer specializing in applied AI systems — from agentic LLM tool-calling to production forecasting pipelines.
- Built a Personal Finance & Smart Investment Copilot: a local-first platform combining an autonomous SQL-querying LLM agent (Google Gemini) with ML models (Linear Regression, Random Forest) for forecasting and portfolio risk visualization.
- Comfortable owning a system end-to-end — data pipeline, model, evaluation, and deployment.

TECHNICAL SKILLS

Core	Python (3.x), SQL, C++, C
Applied AI / Agents	LLM tool-calling & function orchestration (Google Gemini API), autonomous query generation, prompt engineering
ML / Deep Learning	PyTorch, TensorFlow/Keras, Scikit-learn — CNN/RNN architectures, supervised/unsupervised learning, model evaluation (precision, recall, F1)
Data Systems	SQLite/SQL data modeling, multi-format ETL (CSV/Excel/PDF ingestion), Pandas, NumPy
Visualization & Frameworks	Plotly (2D/3D), Streamlit, REST API integration
Cloud	AWS Cloud Foundations (AWS Academy)
Engineering Practice	Git/GitHub, Agile fundamentals

EXPERIENCE

Python Full Stack with ML, Dish Network — Englewood, CO | Jun 2025 – Apr 2026

- Built Python, Django, and Flask backend services, secure REST APIs, and React.js interfaces for customer account management, subscription tracking, and support workflows.
- Integrated ML models into production for customer behavior prediction, service recommendations, and issue classification, backed by Pandas and Scikit-learn data pipelines.
- Deployed on AWS (EC2, S3, RDS) with Docker and Jenkins CI/CD; used Celery/RabbitMQ for background jobs, pytest for testing, and JWT for secure access.

Environment: Python, Django, Flask, React.js, REST APIs, Scikit-learn, Pandas, PostgreSQL, Celery, RabbitMQ, AWS, Docker, Jenkins, pytest

Personal Finance & Smart Investment Copilot, Master's Capstone — University of Central Oklahoma

- Architected a local-first financial platform unifying transaction accounting, dual-model ML forecasting, and a conversational AI analyst.
- Engineered an agentic analyst on Gemini 2.5 Flash that writes its own SQL queries and calls live market-data functions (yfinance).
- Built Linear Regression and Random Forest forecasting models and a custom 3D Plotly portfolio risk visualization.

Environment: Python, Streamlit, SQLite, Scikit-learn, Plotly, Google Gemini API, yfinance

Python Full Stack Developer, Slash Mark (in collaboration with AICTE) — Dec 2023 – May 2024

- Developed enterprise web applications with Python, Django, Flask, and Django REST Framework, plus React.js/Redux front ends.
- Built PostgreSQL/MySQL data models and optimized queries; implemented JWT/OAuth 2.0 authentication and Celery/Redis background jobs.
- Wrote pytest/Unittest tests, deployed on Linux with Gunicorn, Nginx, and Docker, and worked in Agile sprints with BAs and QA.

Environment: Python, Django, Flask, DRF, React.js, Redux, PostgreSQL, MySQL, Celery, Redis, JWT, OAuth 2.0, Docker, Nginx, pytest

AI-ML Virtual Internship, APSCHE-EduSkills — AWS Academy-supported | Jun 2023 – Nov 2023

- Completed a structured 6-month AI/ML virtual internship covering applied machine learning workflows, supported by AWS Academy.
- Built a working foundation in AWS cloud fundamentals alongside core ML skills, later applied in independent capstone projects.

Environment: Machine Learning, Python, AWS Cloud Foundations (AWS Academy)

Web Development and Designing Intern, Oasis Infobyte — 1 month, early 2023

Environment: Web Development, Web Design

Machine Learning Trainee Intern, Indian Servers Pvt Ltd — Vijayawada, India | Apr 2022 – Jun 2022

- Evaluated proposed ML models with a team of interns, identifying overfitting via test-accuracy and cross-validation checks and flagging data redundancies.
- Applied supervised and unsupervised learning in Python and Keras on live company ML projects; performance rated "Good" by supervisor.

Environment: Python, Keras, Supervised & Unsupervised Learning, Model Evaluation (Test Accuracy, Cross-Validation)

EDUCATION

University of Central Oklahoma — Master of Science in Computer Science | 2024 – 2026

R.V.R & J.C. College of Engineering — B.Tech in Computer Science and Engineering | 2020 – 2024

CERTIFICATIONS

- AWS Academy Cloud Foundations — AWS Academy
- Google Data Analytics Professional Certificate — Coursera / Google
- Agile Methodology Virtual Experience Program — Cognizant (Forage)
- Principles of Management & Introduction to Industry 4.0/IIoT — NPTEL (IIT Kharagpur)
